**Sent:** 3/8/2019 1:31:27 AM  
**To:** Chesnutt, John [Chesnutt.John@epa.gov]  
**Subject:** Notes

Attached for your review is this letter. The Letter relates to Hunters Point.

It touches on 3 major things for your consideration

1. EPA's desire to move as quickly as possible to retesting
2. For the 1<sup>st</sup> time ever, they have used the PRG calculator

Attached please find our letter

Background – reason why the Navy is doing the rework.

As you know, the 1<sup>st</sup> parcel for retesting is Parcel G

We've come a long way

But we're not agreeing on the work plan

You'll see the one issue that we have pushed down the road. We might be coming back to talk to you in the coming months

Please provide us with your comments by COB March 13. This is a critical letter because these workplans because these workplans have been significantly delayed. We have a path forward.

Are there any major red flags from a national policy perspective?

We're sending this for your review.

We are raising this to your attention due to the high visibility

One of the most challenging aspects of the workplan.

They will not be happy with the request for public comment

Blame going on

Main purpose process

To get the testing. As the letter states we have presented the path forward to the Navy to proceed series of efforts.

One thing they may take issue with is the public comment but is warranted based on the high level of interest.

Here's our latest higher level communication

Absent a complete approval

Given the scrutiny at this site. The plan is near
